

SENTINELAI

Pitch Deck

AI trading is faster than **you are.**

So why are you trying to compete with it manually? Every edge you think you have, reaction time, intuition, group chats, is already being outpaced by code running on someone else's GPU.

HUMAN SCROLL → PASTE

~3s

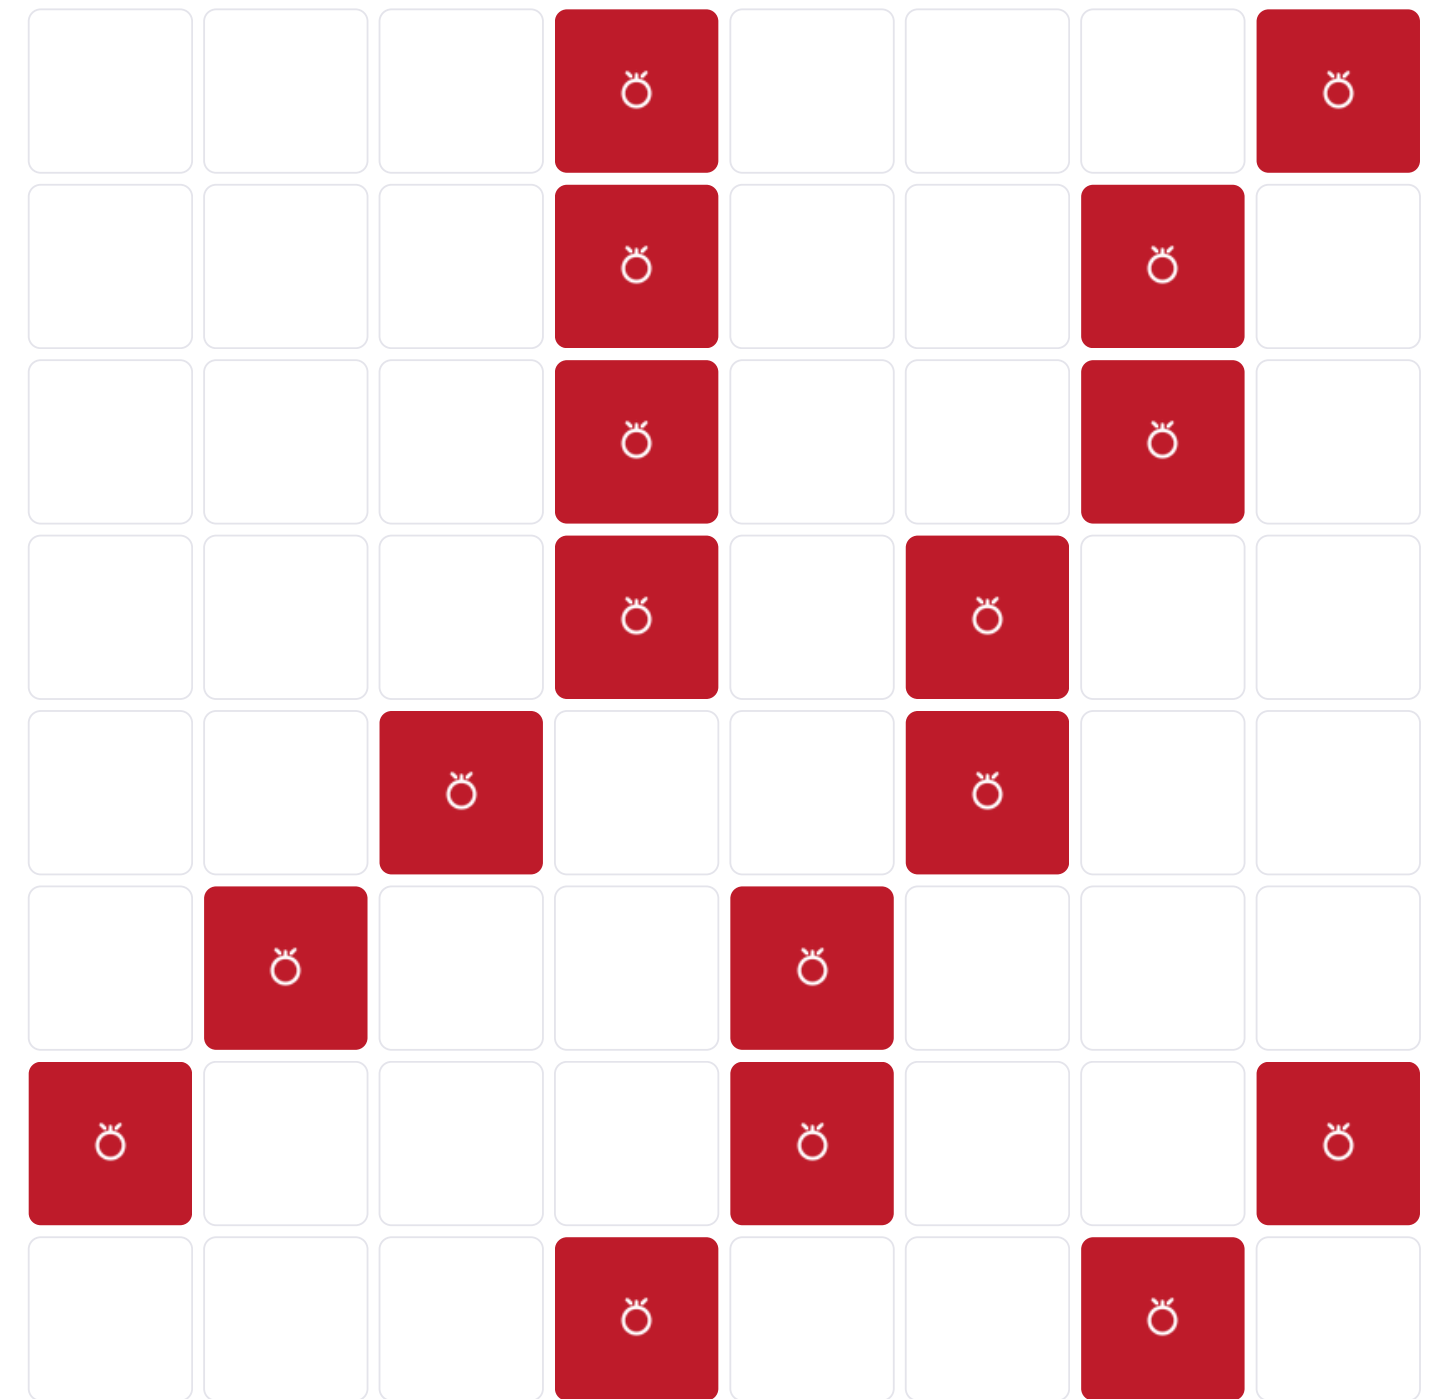

SENTINEL FORWARD

<1ms

The Solana market is a minefield.

Retail walks in with a phone and a feed. They walk out with a hole in their wallet. Every structural advantage sits on the other side of the trade.

■ SCAM / RUG / HONEYPOT □ TRADEABLE

84% of traders lose money

**How are you any
different?**

They didn't lose to the market. They lost to the infrastructure built around it.

0 1 / 03

30M

people traded Solana memecoins
at peak

0 2 / 03

84%

lost money. 58% lost everything.

0 3 / 03

7M

left the ecosystem and never came
back

Launchpads alone extracted **\$762M in 2025**, double the prior year, while only **0.89%** of tokens ever graduated to a real exchange. The platforms took the fees. The bots took the entries. The insiders took the rallies. 7 million people took the loss.

The infrastructure that extracts from traders doubled its revenue year on year.

ANNUAL DEX VOLUME

\$400B+

traded annually on Solana DEXs

TRADING BOT FEES • 2024

\$1.4B

extracted by sniper bots alone. **2× year on year.**

BOT FEES • YOY

TRAILING 12-MONTH • 2024-Q4

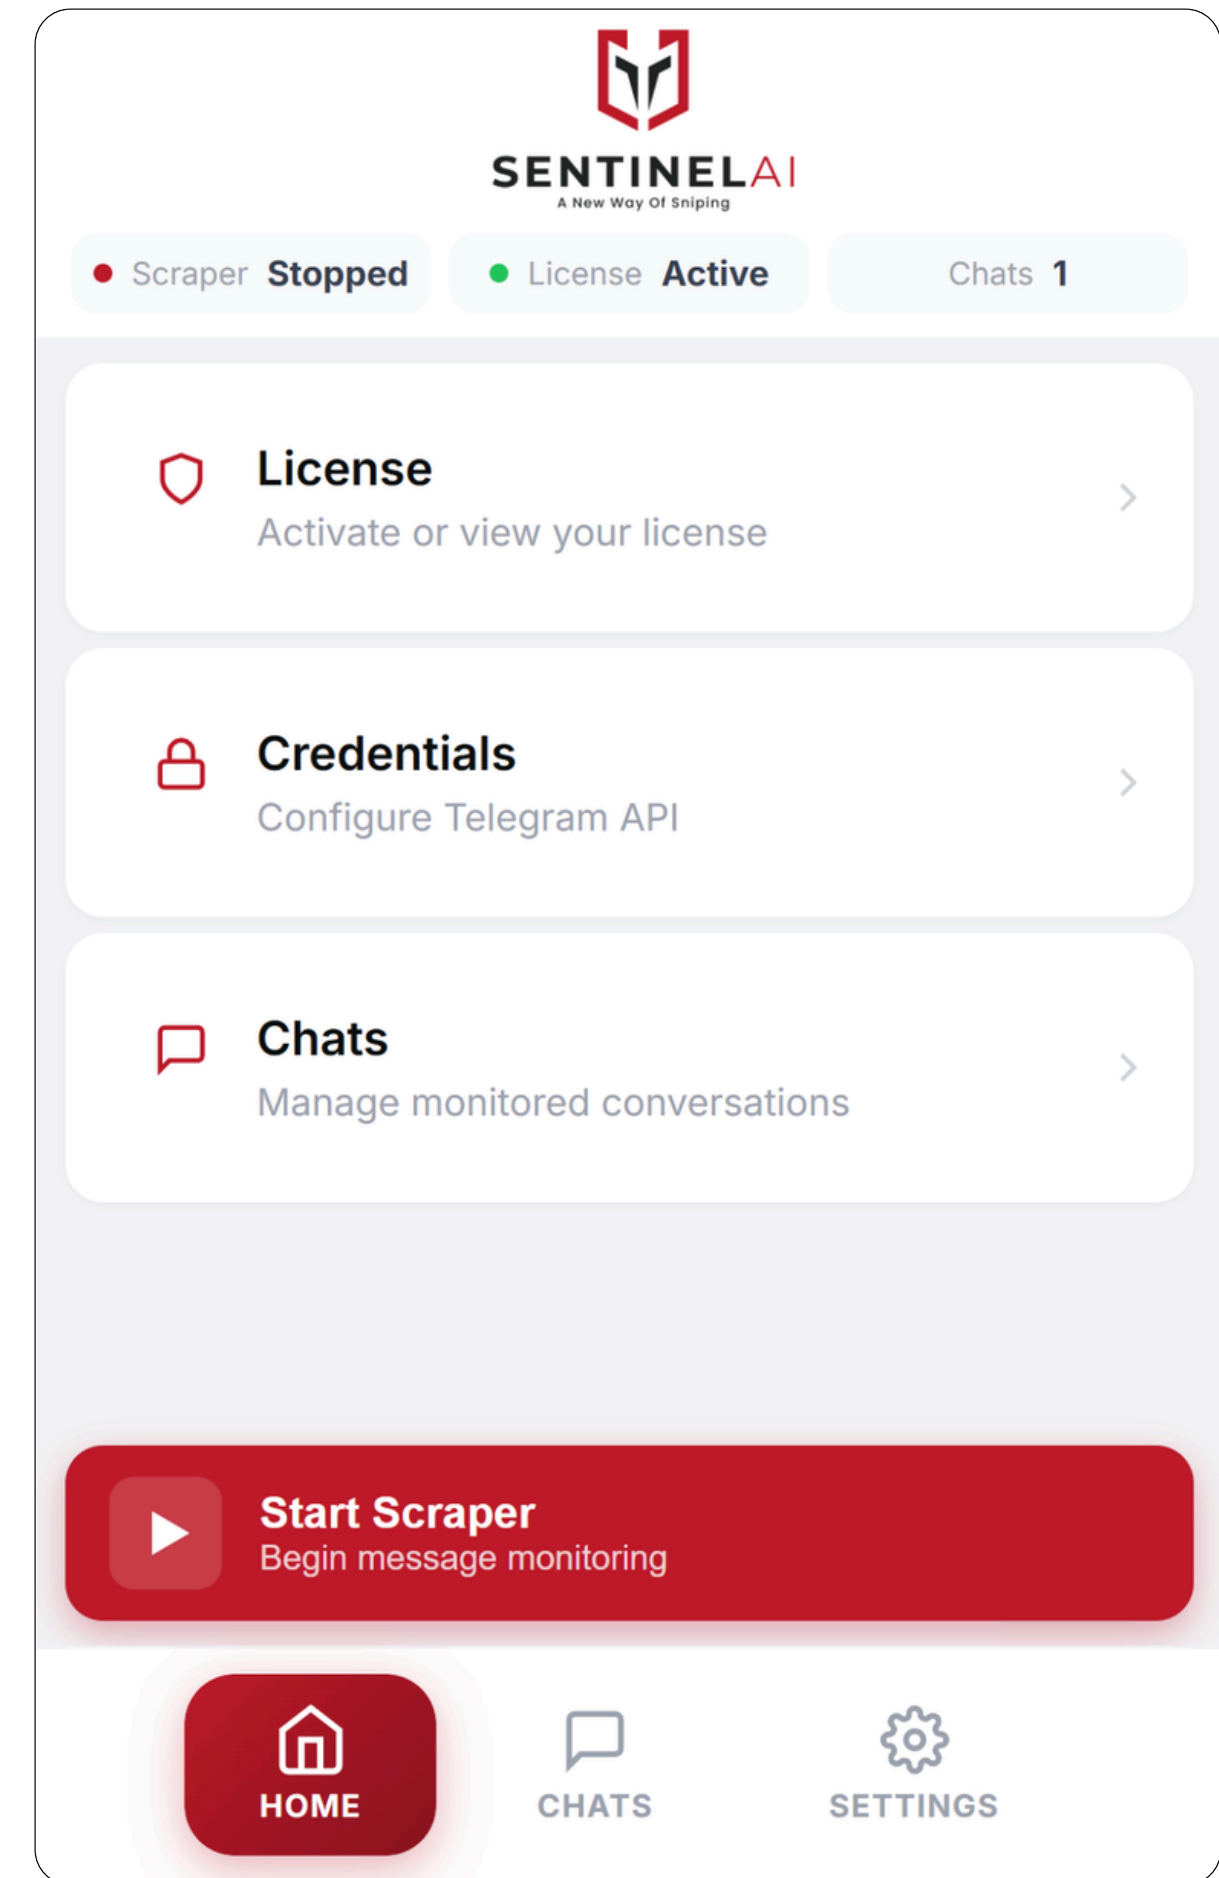

**Every month they don't figure this out
is another month at the job they
hate.**

So Meet Sentinel.

AI powered scraper
that turns scattered
signals into complete
Solana contract
addresses, before
opportunities
disappear.

But why **Sentinel**?

Every tool solves one thing.

None solve all three.

Speed

Sniping bots
Fast entries

Signals

Alpha groups
Social feeds

Protection

Risk scoring
Scam detection

The window is **now**.

ROADMAP

Q2 2025

Private Beta

- ✓ Live forwarding to bots
- ✓ Sub-1ms median forward
- ✓ TG + Discord support

Q2 2026

Public Launch

- Subscription live (\$1/2/5 SOL)
- Referral + KOL program
- P&L dashboard V1

Q4 2026

Trading Bot

- 1% tx fee on all trades
- Non-custodial execution
- Jito priority lane

2027+

AI-Native Ecosystem

- Auto-signals from on-chain
- Strategy marketplace
- TGE + utility token

Our Founding Team

Leone Vittorio Andreis

Founder

Active Solana trader with a background in blockchain and business.

- Student at EDHEC Business School
- Former NFT trader during the market peak
- Solana trader for nearly 2 years, focused on token launches and automation
- Oversees product direction, partnerships, and overall strategy
- Strong understanding of AI-driven tools and blockchain systems

[LINKEDIN](#)

Alexandre Fossion

Developer

Software Developer with 6+ years of experience, including 5 in Web3 and blockchain.

- Built full-stack apps and decentralized projects (marketplaces, gaming/betting dApps, automation systems).
- Skilled in React, Node.js, Python, Solidity, Rust, JavaScript, and SQL/NoSQL databases.
- Designs and secures smart contracts, builds APIs, and creates user-friendly frontends with clean, maintainable code.

[LINKEDIN](#)

Edoardo Marzorati

Co-Founder

Web-3 Trader and Entrepreneur

- Student at ESCP Business University
- Previous experience in software projects in the sneaker reselling market since 2019
- Strong experience in botting and improving software execution speeds in different markets.
- In-depth macro-economic understanding and analysis to improve product release timings and general environment sentiment

[LINKEDIN](#)

We're raising to **launch publicly** , scale to 3,000 users, and ship the bot.
